

URGENT MEDICAL DEVICE CORRECTION URGENT FIELD SAFETY NOTICE

Subject: Treatment field calculated with an energy other than that selected

Commercial Name of Affected Product: Eclipse 10 (Client builds 10.0.28 and 10.0.34)

Reference / FSCA Identifier: CP-05308

Date of Notification: **2011-08-25**

Type of Action: Notification

Details on Affected Devices: Refer to appendix page.

Description of Problem:

This letter is to advise you of an anomaly in Varian's Eclipse Treatment Planning System version 10. The issue is that the treatment field energy may change from the current selection to a previous selection without user intervention and without invalidating the MU or calculated dose distribution.

Details:

The energy shown or selected by the treatment planner in the **fields** tab of External Beam Planning and in the **general** tab of field properties may differ from the value actually used for dose calculation.

This issue is caused by incorrect handling of the energy mode object within the memory cache system used by Eclipse External Beam Planning Version 10. When the user changes the field energy, the memory cache anomaly may result in the use of the previously selected field energy instead of the intended field energy. This cache memory issue may arise when switching between software applications (such as between External Beam Planning and RT Chart), when using multiple sessions, or when switching between patients in a single session of the External Beam Planning application in Eclipse.

When this issue occurs, it can be identified by inspection of the **dose** log and **LMC** log (leaf-motion calculator logs are generated for IMRT and electronic compensator fields) in the "errors and warnings from last calculation" in the **calculation** tab of the field properties (Figure 1A). The MU and dose distribution will be correct for the energy shown in the **dose** and **LMC** calculation logs.

URGENT MEDICAL DEVICE CORRECTION URGENT FIELD SAFETY NOTICE

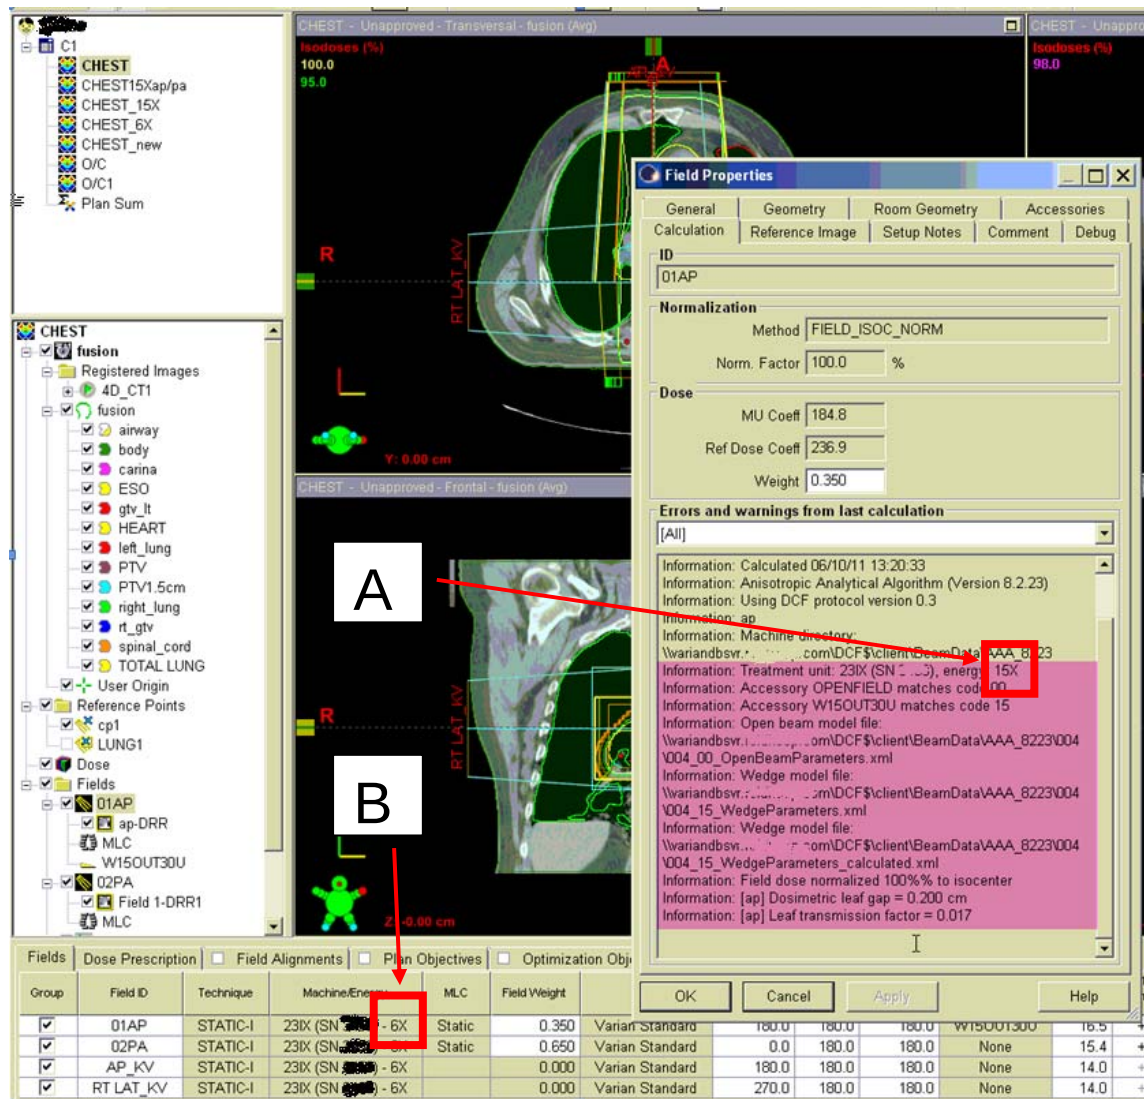

Figure 1. (A) The actual energy used in the field dose calculation disagrees with (B) the energy displayed in **Fields** tab of External Beam Planning.

URGENT FIELD SAFETY NOTICE

Recommended User Actions:

1. As described below under **Varian Actions**, Varian will be contacting you and will apply a database configuration script to your database. Even after Varian applies this script:
 - a. Do not use multiple sessions in Eclipse;
 - b. Always close the patient file in Eclipse after completing work on the patient record;
 - c. Always close Eclipse fully before opening a new patient.
2. Compare the energy shown in **dose** section and **LMC section** (if applicable) of the “errors and warnings from last calculation” log (see Figure 1) in the **Calculation** tab of the field properties dialog (Figure 1A) with the energy value shown in the **Fields** tab of External Beam Planning (Figure 1B) to detect a discrepancy;
3. If there is a discrepancy between the energy value shown shown in the “errors and warnings from last calculation” logs in the **calculation** tab of field properties with the energy value shown in the **fields** tab of External Beam Planning, then copy the treatment plan, invalidate the dose with **Planning → Dose Calculation → Reset Calculation Volume**, then recalculate; AND
4. Confirm all treatment planning calculations as cautioned and warned below:

From Eclipse Instructions for Use, PN B502681R01A, p.29

CAUTION: Verify the dose calculation and dose display against independent verification methods, for example, manual calculations, to ensure that the

- MU data is correctly interpolated and calibrated.
- MU calculation is correct.
- Configuration of the dosimetric data is correct.

From Eclipse Reference Guide, PN B502675R01A, p.740

WARNING: Before approving plans or plan sums for treatment,

- Always perform QA tests on a physics phantom to make sure that the plan is correctly transferred to the treatment machine.
- Always verify plans with DVH analysis when approving plans or plan sums for treatment.

URGENT MEDICAL DEVICE CORRECTION URGENT FIELD SAFETY NOTICE

Varian Actions:

- Varian is notifying potentially affected customers with this document.
- A Varian representative will contact affected customers to apply a database configuration script that will reduce the possibility of this unintended change in selected energy when switching between applications.
- Varian is preparing a correction for Eclipse Version 10 to address this issue.
- A Varian representative will contact you to schedule the installation of the correction when it is available.

Please advise the appropriate personnel working in your radiotherapy department of the content of this letter. For future reference, this document will be posted to the Varian customer support website: <http://www.MyVarian.com>.

Special Instructions for customers outside the USA and Canada: In order to satisfy regulatory requirements, we request that you complete the attached Proof of Notification or Receipt Verification Card once you have read this document and return it to Varian Medical Systems.

We sincerely apologize for any inconvenience and thank you in advance for your cooperation. If you require further clarification, please feel free to contact your local Varian Customer Support District or Regional Manager.

The undersigned confirms that this notice has been provided to the appropriate Regulatory Agency.

Michael Pignataro, Manager Reporting and Corrections
